## "THE SPICE OF LIFE"

No one can live out a well rounded, healthful, normal life without variety. "The spice of life" is necessary, for without it existence is flat, stale and profitless indeed.

Music possesses infinite variety. It plays upon the emotions; it changes, with the quickness of thought itself, sorrow to joy, tears to laughter; it fans into flame in an instant the fires of patriotism; it brings the solace of religion, the exaltation of Divine Communion.

And so music, and music alone, may truly be said to be "the spice of life."

When you have in your home
